What about the data that sits on the shelf, that doesn't have the support of big industry and media interests? Data that supports simple, inexpensive, and safe natural interventions? Data that exposes the dark side of pharmaceutical products? GMI has done the research for you, to the tune of 23k abstracts meticulously indexed, accessible, and searchable. It is an unparalleled resource for the academic, the clinician, and the self-empowering consumer. Form your own opinions, starting here."
